

IMMUNIZATIONS & TESTS CHECKUP SCHEDULE

Your child will be given a series of immunizations beginning as a newborn. These shots provide your child with protection against many dangerous but preventable diseases. In addition, other tests, including blood tests, are routinely performed at certain ages. The schedule, as recommended by the American Academy of Pediatrics, is listed below.

BIRTH	Hepatitis B – routinely given in the hospital
2 WEEKS	Checkup with pediatrician
2 MONTHS	Checkup with pediatrician Immunizations: Pediarix (DTaP, IPV, Hep B); HIB; Prevnar; Rotavirus (oral)
